Formatos de papel

As seguintes definicións do formato de papel estarán no arquivo **"report_informacion.xml"**

Podemos definir varios formatos de papel (por exemplo: portrait e landscape).

Para elo insertaremos no modelo `model="report.paperformat"` distintos records cada un coa súas características e con un id externo distinto para identificalo. Por exemplo `id="paperformat_euro_portrait"`

```
<record id="paperformat_euro_portrait" model="report.paperformat">
  <field name="name">European A4 Portrait</field>
  <field name="default" eval="True" />
  <field name="format">A4</field>
  <field name="page_height">0</field>
  <field name="page_width">0</field>
  <field name="orientation">Portrait</field>
  <field name="margin_top">40</field>
  <field name="margin_bottom">23</field>
  <field name="margin_left">15</field>
  <field name="margin_right">15</field>
  <field name="header_line" eval="True" />
  <field name="header_spacing">35</field>
  <field name="dpi">90</field>
</record>
```

```
<record id="paperformat_euro_landscape" model="report.paperformat">
  <field name="name">European A4 Landscape</field>
  <field name="default" eval="True" />
  <field name="format">A4</field>
  <field name="page_height">0</field>
  <field name="page_width">0</field>
  <field name="orientation">Landscape</field>
  <field name="margin_top">40</field>
  <field name="margin_bottom">23</field>
```

```
<field name="margin_bottom">25</field>
<field name="margin_left">7</field>
<field name="margin_right">7</field>
<field name="header_line" eval="True" />
<field name="header_spacing">35</field>
<field name="dpi">90</field>
</record>
```

Despois de actualizar o noso módulo poderíamos ver mediante pgadmin como foron insertados c dous rexistros anteriores:

The screenshot shows the PgAdmin interface with the 'report_paperformat' table selected. The 'Data Output' tab displays the following data:
